BDP® 581/591 tetrazine

http://www.lumiprobe.com/p/bdp-581-591-tetrazine

BDP 581/591 is a borondipyrromethene dye with red emission. The dye exhibits high emission quantum yield and molar extinction coefficient, relatively long fluorescence lifetime, and two-photon cross-section. Additionally, it can be used as an intracellular ROS sensor.

This tetrazine derivative allows to conjugation of the fluorophore with various strained dienophiles like trans-cyclooctenes in a fast reaction called TCO-ligation.

P₂ N-N

Structure of BDP 581/591 tetrazine

Absorption and emission spectra of BDP 581/591

General properties

Appearance: colorless solid

 $\begin{array}{ll} \text{Mass spec M+ increment:} & 574.2 \\ \text{Molecular weight:} & 575.42 \\ \text{Molecular formula:} & C_{32}H_{28}N_7BF_2O \end{array}$

Solubility: well soluble in DMF, DMSO, dichloromethane, toluene

Quality control: NMR ¹H, HPLC-MS (95%)

Storage conditions: Storage: 24 months after receival at -20°C in the dark. Transportation: at room

temperature for up to 3 weeks. Avoid prolonged exposure to light. Desiccate.

Legal statement: This Product is offered and sold for research purposes only. It has not been tested for

safety and efficacy in food, drug, medical device, cosmetic, commercial or any other use. Supply does not express or imply authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, in the manufacture of food

or pharmaceutical products, in medical devices or in cosmetic products.
