

## Pyrenebutyric acid

<http://www.lumiprobe.com/p/pyrenebutyric-carboxylic-acid>

Pyrenylbutyric acid is a derivative of pyrene hydrocarbon with a free carboxylic acid function. The reagent is useful as a control for experiments with other reactive pyrene derivatives such as [pyrene NHS ester](#) and [pyrene azide](#). Carboxylic acid function can be activated by carbodiimides and other activating reagents.

Structure of Pyrenebutyric acid

Absorption and emission spectra of pyrene fluorophore

### General properties

Appearance:	off white solid
Molecular weight:	288.34
CAS number:	3443-45-6
Molecular formula:	C <sub>20</sub> H <sub>16</sub> O <sub>2</sub>
Solubility:	good in DCM, chloroform
Quality control:	NMR <sup>1</sup> H, HPLC-MS (95%)
Storage conditions:	Storage: 24 months after receipt at -20°C in the dark. Transportation: at room temperature for up to 3 weeks. Avoid prolonged exposure to light.
Legal statement:	This Product is offered and sold for research purposes only. It has not been tested for safety and efficacy in food, drug, medical device, cosmetic, commercial or any other use. Supply does not express or imply authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, in the manufacture of food or pharmaceutical products, in medical devices or in cosmetic products.

### Spectral properties

Excitation/absorption maximum, nm:	343; 326; 313; 276; 265; 242; 234
Emission maximum, nm:	377; 397
