

## sulfo-Cyanine3 tetrazine

<http://www.lumiprobe.com/p/sulfo-cy3-tetrazine>

Tetrazine-*trans*-cyclooctene ligation is among the fastest bioconjugation reactions known to date.

This water-soluble sulfo-Cyanine3 derivative contains methyltetrazine moiety for the coupling with *trans*-cyclooctenes. Methyltetrazines possess optimal stability at physiological pH, while maintaining extremely high reactivity towards cyclooctenes.

The fluorophore is bright, photostable, and is also very well visible with naked eye.
